

FLASH CURING UNITS

SUPER SECA FLASH CURING UNITS

The Super Seca is the most economical and functional flash curing unit in the industry. Keeping with the Workhorse tradition, the Super Seca is built to last with the dependability you need for your print shops needs.

Features:

- 10 year warranty.
- 360 degree head rotation.
- Adjustable height.
- Totally portable.
- Infrared heat panel.
- Energy reflectors for enhanced edge curing.
- Sturdy 5 leg base.
- 110V or 220V systems.

Radiant Flash Unit

Radiant Flash

Our low cost, high production flash curing solution for those jobs where you can sacrifice a print head.

FALCON COMPATIBLE FLASH UNITS

All Falcon flash curing systems incorporate the use of high power quartz elements for the fastest flashing possible. These elements cycle on and off with the index of the machine. Thus, only heating and consuming power when needed.

Plug-N-Go Flash

This flash is designed to work exclusively with the Falcon line of presses. Simply plug this flash into any print head and the press will take over all flash controls.

Plug-N-Go
(Also available in 20 x 32" size)

Universal Flash

This flash has all the features of the Plug-N-Go and uses a built in sensor and timer to control the flash. This machine can be used universally on most all printing presses.
